MANAGED CLOUD OPERATIONS

DDEVOPS provide Managed Cloud servers for your applications that deliver optimal OS maintenance, software performance, and high hand security to Your cloud servers.

▶ CLOUD COMPUTE

Boost your application performance up to 90% with our PHP, JAVA or MEAN stack, powerful managed cloud servers packed with ultimate features & Security.

▶ CPU AND MEMORY OPTIMIZED

CPU Optimized virtual machines are with dedicated hyper-threads from best-in-class CPUs for intensive application, and Memory Optimized servers to deliver fast performance for workloads that process large data sets in memory.

GLOBAL AVAILABILITY

15 Data Center locations and 3 Support Centers

FULLY MANAGED

DDEVOPS WEB ENGINES

DDevOps developed stacks for PHP, JAVA and MEAN, they got highly tweaked configurations combined with additional web layer for caching and security. These stacks design to boost up your application performance up to 90% so you could entertain more traffic with better user experience, security layer helps in intrusion detection and prevent unwanted attempts, choose your stack today and evolve from traditional hosting to DDevOps.

DDEVOPS WEB ENGINES

▶ PHP STACK

Optimized Nginx, Varnish, Redis, PHP, OpCache, Apache, MySQL, and Memcached configurations ensure peak performance, response, and security

▶ JAVA STACK

configured for better security, performance and response time, secret ingredients combined with Nginx, Elasticache, Tomcat, MySQL/PostgreSQL, Memcached.

▶ MEAN STACK

Optimized Nginx, Node, Angular, NPM, MySQL/PostgreSQL, MongoDB, Redis, and Memcached configurations deliver superior performance and security

▶ PYTHON

Python web engines like WSGI and ASGI connect applications to servers, supporting synchronous and asynchronous web frameworks.

MANAGED DEDICATED OPERATIONS

In Cloud Computing era people often underestimate the power of dedicated hosting due to other cheap options, but we know the importance of enterprise-grade dedicated hardware that ensures true isolation and control over your resources. Our fully managed dedicated servers come with your choice of OS and software's or with one of the most popular and advanced hosting panel cPanel/WHM. Our lightning-fast network coupled with DDOS protected Gbps connectivity provide low-latency throughput all around the world.

● **MANAGED DEDICATED CPANEL SERVER**

Fully managed dedicated cPanel servers come with the top of the line and advanced hosting panel (cPanel/WHM) to host multiple sites & environments.

● **MANAGED DEDICATED LINUX SERVER**

Fully managed enterprise-grade dedicated hardware that ensures true isolation and control over, come with your choice of software & tools.
