ENGINEERING THE FUTURE

Building the robust infrastructure that
powers tomorrow.

www.ddevops.com

End-to-End Engineering For Your Deployment, Developments, Operations

From the rise of Docker to the dominance of Kubernetes, DDevOps has been at the forefront of infrastructure evolution. We combine Dedicated Service with the educational power of DDevOps Academy to deliver an invincible team for your business.

www.ddevops.com

VISION

Driving excellence through performance, innovation, and impact

MISSION

We empower businesses to achieve greater product availability by enabling programmers to focus on code and owners to focus on growth. Through a culture of smart management and streamlined operations, we deliver solutions that are scalable, cost effective, and designed to minimize errors and interventions ensuring technology works seamlessly while your business thrives.

TURNING INFRASTRUCTURE INTO A COMPETITIVE ADVANTAGE

MANAGED OPERATIONS

We provide reliable, scalable support—handling your technical backbone so you can focus on growth.

CLOUD OPERATIONS

It's possible to simultaneously manage and transform information from one server to another.

SHARED OPERATIONS

We provide the most responsive and functional IT design for companies and businesses worldwide.

DEDICATED OPEARTIONS

Back up your database, store in a safe and secure place while still maintaining its accessibility.

www.ddevops.com

DEVOPS SERVICES

DDevOps offers a wide range of IT services to handle operational requirements along with cicd to keep you on a continuous path of advancement.

COLLABORATION

our it operations work with the best collaboration practices to play a significant role in the development of the application lifecycle

AUTOMATION

We automate the complete delivery cycle to ensure deployments and rollbacks are just one click away, increasing productivity

CONTINUOUS MONITORING

Continuous monitoring detects bugs and issues quickly, often before they affect your infrastructure or entire application

CONTINUOUS TESTING

The continuous testing environment helps developers balance quality and speed while ensuring error-free code delivery

CONTINUOUS INTEGRATION

The devops team follows best practices and uses various tools with a collaborative approach to support continuous application integration

CONTINUOUS DELIVERY

Continuous delivery is all about taking continuous integration to the next level, delivering results with less complexity

CLOUD AGNOSTIC. VENDOR NEUTRAL.

We play nice with everyone.
Whether you run on AWS, Azure,
Google Cloud, or Bare Metal our
certified engineers optimize your
stack for your specific
environment.

- 01 ENHANCED SECURITY AND PERFORMANCE
- 02 IMPROVE DEPLOYMENT EFFICIENCY
- 03 CI/CD AND AUTOMATION
- 04 CONTINUOUS MONITORING AND IMPROVEMENTS
- 05 REDUCED FAILURES AND ERRORS
- 06 HIGH AVAILABILITY FOR HIGHER ROI
- 07 FAST RECOVERY AND DISASTER MANAGEMENT
- 08 UP TO 40% COST EFFICIENCY

DEVSECOPS SERVICES

Security is no longer a final hurdle; it is the foundation. We have shifted security 'left,' embedding automated threat detection and compliance checks into every line of code before it ever reaches production. No bottlenecks. No surprises. Just secure, compliant releases every single time.

END-TO-END SECURITY ZERO COMPROMISE

"We don't just patch holes; we build fortresses. Our 'Security as a Service' model aligns strictly with the OWASP Top 10 to neutralize threats like SQL Injection, XSS, and DDoS attacks before they ever touch your infrastructure. From the network edge to the application core, we deploy a multi-layered defense strategy that evolves faster than the hackers do."

- Network and Infrastructure Security
- System and Endpoint Security
- Web Application Firewall
- Ransomware Protection
- Data encryption and Worm storage
- Gbps DDOS Protection against millions of the packets per second
- UDP, TCP, ICMP, SYN, and HTTP Flood Protection
- Protection against HTTP/HTTPS, XML RPC, Bandwidth Leeching, Botnet etc
- Security Audit and Compliance

WEB & APP DEVELOPMENT

A PERFECT APPLICATION

We don't just design pretty sites; we engineer user experiences. From wireframing to high-fidelity prototypes, our design process focuses on intuitive navigation, mobile responsiveness, and visual storytelling that aligns perfectly with your brand identity.

WEB DESIGN

We understand every aspect of web design from enterprise platforms to simple brochure sites. No matter the project size, we ensure a sleek, user-friendly experience for your customers.

WEB DEVELOPMENT

While traditional agencies build standard CMS sites, we focus on advanced, secure solutions for complex needs. From multi-platform e-commerce to custom builds, our process is driven by technology from start to finish.

MOBILE APPS

Whether you need a simple, elegant app or something more dynamic, we help turn any idea into reality. We build innovative mobile solutions and even suggest new ideas to elevate your business.

THE DEVOPS AGILE WORKFLOW

From idea to production using automation-first DevOps practices.

01

DISCOVERY

Requirements, business logic & feasibility analysis.

02

DESIGN

UI/UX wireframes, flows & interactive prototypes.

03

DEVELOPMENT

Agile sprints with CI/CD and automated testing.

04

LAUNCH

Automated deployment, QA & live monitoring.

OUR PARTNERSHIP FRAMEWORKS

we collaborate through clearly defined frameworks that align technology, operations, and long-term growth objectives.

● TYPE 1

INDEPENDENT SOFTWARE VENDORS (ISVS) & TOOL PROVIDERS

Who this is for: Companies like Splunk, Docker, HashiCorp, or new SaaS monitoring/security tools.

How we collaborate: We integrate your tools into our standard CI/CD and operational pipelines. We become experts in deploying and managing your software, ensuring our clients get the most out of your features without the operational headache.

Goal: Seamless technical integration and “Preferred Tool” status in our stacks.

● TYPE 2

CLOUD & INFRASTRUCTURE ALLIANCES

Who this is for: Hyperscalers (AWS, Azure, Google Cloud) and specialized infrastructure providers (DigitalOcean, Vultr).

How we collaborate: DDevOps acts as the expert service layer on top of your raw compute. We help clients migrate to your platform and ensure they follow best practices, driving consumption and stickiness on your infrastructure.

Goal: Driving adoption of your platform through expert managed services.

www.ddevops.com

WHITE-LABEL TECH SOLUTIONS

We help organizations implement and optimize their technical systems. Our white-label program typically takes place between technology vendors who provide IT products and the agencies and companies who want to enhance their daily operations capabilities through our skills employed to deliver the service (design, build, run) from your own branding. Technically, these fall into three main categories: business process services, application services, and infrastructure services.

RELIABLE WHITELABEL SOLUTION FOR

AGENCIES

we help organizations implement and optimize their technical systems. our whitelabel program typically takes place between technology vendors who provide it products and the agencies and companies who want to enhance their daily operations capabilities through our skills employed to deliver the service (design, build, run) from your own branding

www.ddevops.com

OUR WHITELABEL FRAMEWORKS

Clearly defined collaboration models designed for agencies and IT providers looking to scale without expanding internal teams.

TYPE 1

DIGITAL & CREATIVE AGENCIES

Who this is for: Marketing agencies, Web Design firms, and SEO companies.

How we collaborate: You focus on the creative vision, UI/UX, and client relationships. We act as your “Backend Engineering Department,” handling the server setup, CMS customization, and deployment pipelines invisibly.

TYPE 2

IT CONSULTANCIES & MSPS

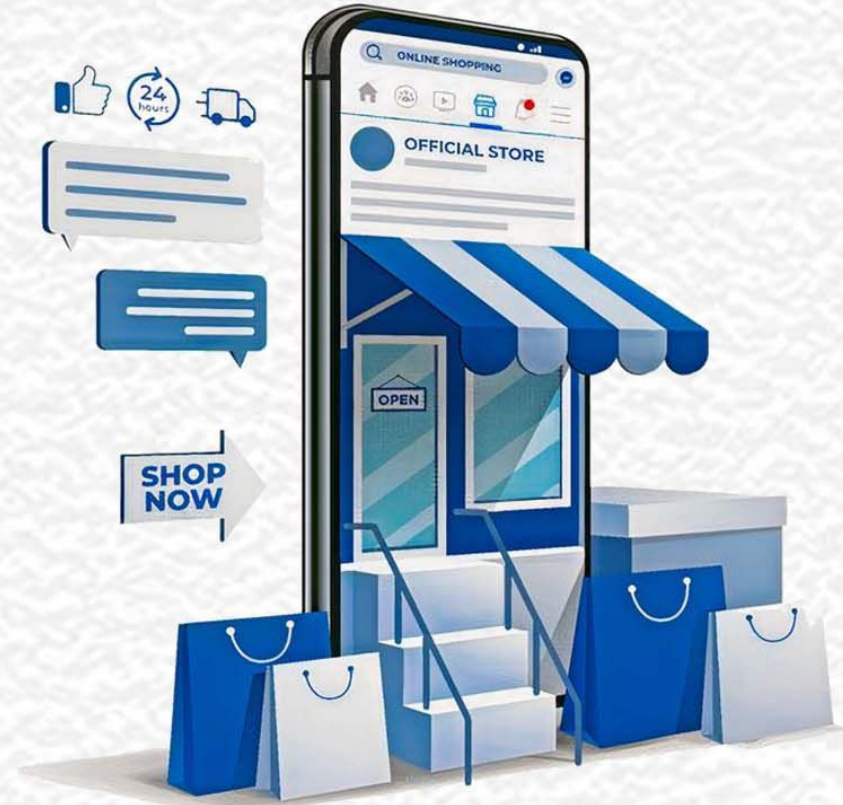

Who this is for: Managed Service Providers and IT consultants facing capacity limits.

How we collaborate: DDevOps provides “Overflow Support” and specialized expertise (like Kubernetes or Cloud Migration) that your team might lack. We work within your ticketing systems and use your email domains to support your end clients.

www.ddevops.com

HIGH-PERFORMANCE E-COMMERCE

DDevOps transforms online stores into revenue engines. We help startups launch fast and established brands scale effortlessly. Unlike traditional agencies, we integrate DevOps methodologies (CI/CD) directly into your store's architecture. This means you can roll out new features instantly without downtime, handle massive traffic spikes during sales events, and enjoy enterprise-grade security. We ensure your store is always fast, always online, and always converting.

LET'S GET EVERYONE ONLINE

RELIABLE, RESPONSIVE & PROGRESSIVE WEBSITES FOR A YEAR

DDevOps is committed to digital inclusion. We support communities, startups, and small businesses by removing the barrier to entry. We deliver a complete, high-performance WordPress solution that helps you connect with the world—without breaking the bank.

- ✓ Premium WordPress Setup
- ✓ Mobile Responsive Design
- ✓ 1 Year Hosting & Maintenance
