DEPLOYMENT DEVELOPMENT OPERATIONS

COMPANY & SERVICES

DDEVOPS
Deployment Development Operations

ABOUT US

Traditional IT operations changed in the past few years, and gradually evolved into TechOps, DevOps, SecOps. Technically, from these three main categories we bring IT solutions under one umbrella called **Dedicated DevOps**.

Who We Are?

Team of professionals with 15+ years of IT experience, fully dedicated to technology-focused solutions for best quality IT services and always available support to serve you anywhere, anytime. We aim to provide you with the best development and operational assistance for your IT infrastructure.

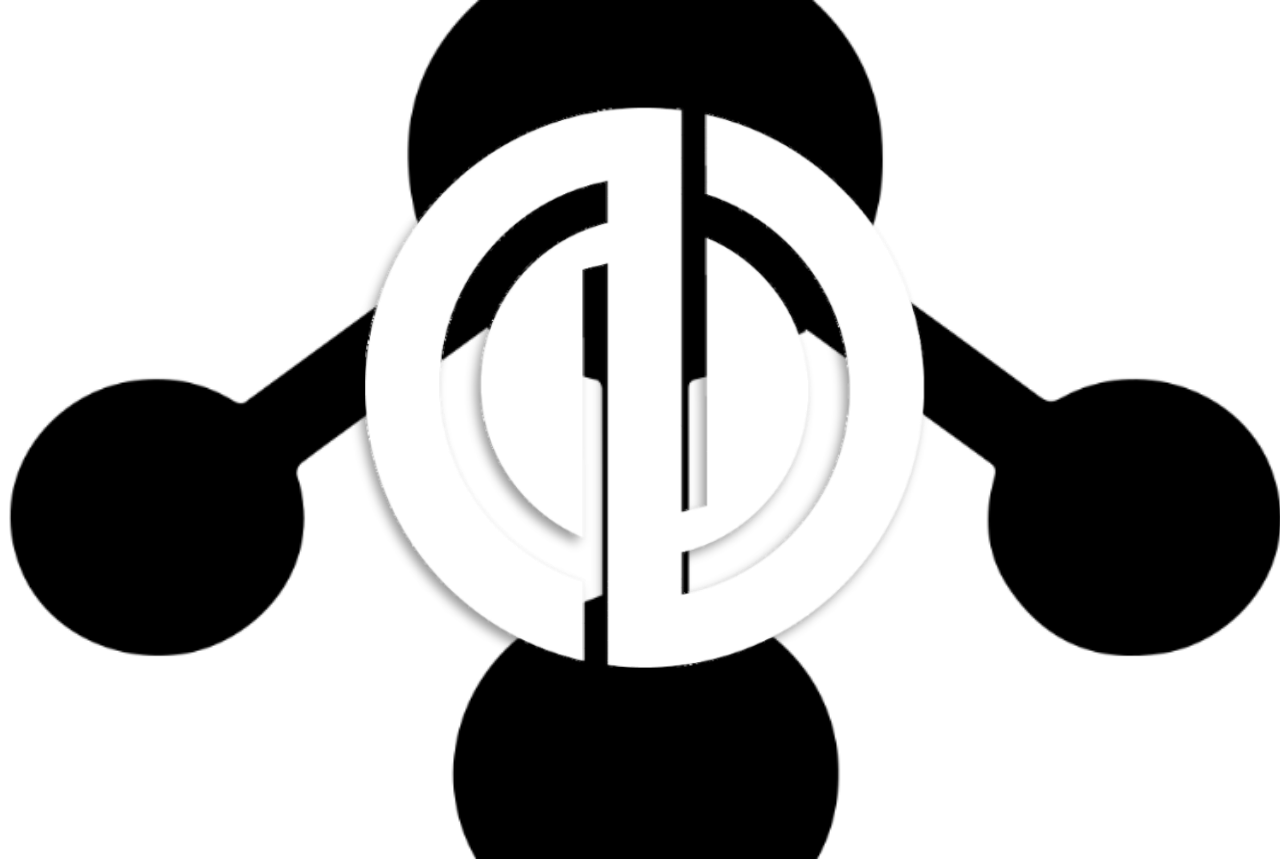

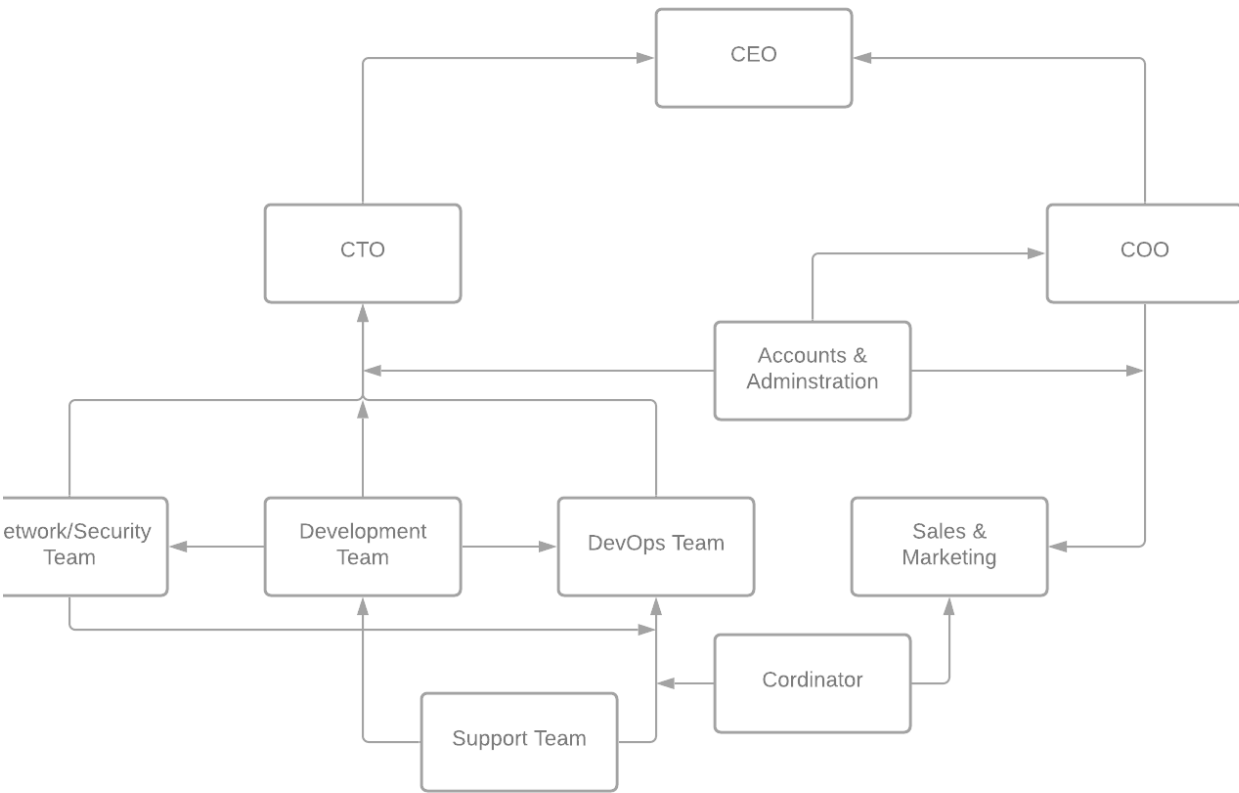

What We Do?

Our skilled professionals are aware of the code and application, so it is not just hosted server or infrastructure support, but a complete IT solution along with best development, operational, and security practices. We promise to serve you with better professionals and the best tech team.

How We Act?

We are here on a mission to increase product availability, by helping programmers focus on code and owners to focus on business by establishing the best managerial and operational culture that is more scalable, cost-effective, and have fewer interventions and errors.

COMPANY STRUCTURE

“Strong individuals built up an invincible team, be a part, get relax and stay at ease to focus more on your core business.”

DDevOps one-window technology focused solutions aim to maximize the productivity, efficiency, security, and maintainability of the operational processes by providing market-leading expertise and mission-critical support across multiple platforms and technologies so you get faster innovation, accelerated time to market, enhanced development, better operational efficiency, and apart from all, more time to focus on core goals of your organization.

- **Shared Operations**
- **Cloud Operations**
- **Dedicated Operations**
- **DevOps Service**
- **SecOps Service**
- **Design & Development**

SERVICES

DDevOps is all about Development Operations, we welcome individuals, developers, agencies, software houses, corporate sectors and large enterprises. We help your startups by providing cost effective managed services and take you to be an enterprise by supporting you on the way through Managed Operations, DevOps Services and Advanced security.

MANAGED SHARED OPERATIONS

More than a decade of experience in IT operations and security, having a track record of high performance, and technology-oriented solutions. We are the best choice for your managed Shared hosting.

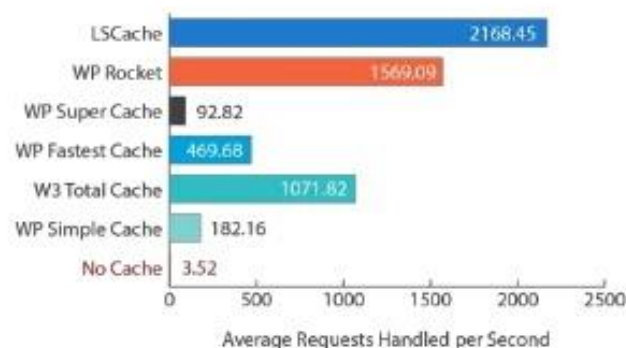

- **Fully loaded shared environments with isolated resources**
- **Better hardware performance with optimized software architecture**
- **DDOS protected network and fully secured centralized firewall**
- **cPanel for better web management and performance**
- **Optimize web engine and better response time**

Shared Operation Service Includes...

Super Fast

- 1** Powerful LSCache for Dynamic Content
PHP LSAPI is faster than PHP/FPM.
Static files - 4X-6X faster than Apache.
LSCache - 100X faster **Game changer**
- 2** Handle Tons of Concurrent Users
Event driven architecture same as nginx.
No rapid drop off above 100-200 concurrent users.
- 3** Triple Your Server Capacity, Reduce Hardware & Support Cost

Experience the fastest shared hosting service that helps you to boost your website performance up to 90% packed with ultimate cPanel & LITESPEED features.

- Server Administration
- Server & Application Monitoring
- Alerts, Notifications & Statistics
- Auto Healing Service
- Security Updates & Patching
- Free Domain (Common TLD)
- Tweak & Optimization
- Backup & Recovery
- Free SSL
- Highly Optimized cPanel Stack
- Unlimited Support Tickets
- Round the Clock Emergency Assistance

MANAGED CLOUD OPERATIONS

DDEVOPS PROVIDE MANAGED CLOUD SERVERS FOR YOUR APPLICATIONS THAT DELIVER OPTIMAL OS MAINTENANCE, SOFTWARE PERFORMANCE, AND HIGH HAND SECURITY TO YOUR CLOUD SERVERS.

Global Availability

15 Data Center locations and 3 Support Centers

Cloud Compute

Boost your application performance up to 90% with our PHP, JAVA or MEAN stack, powerful managed cloud servers packed with ultimate features & Security.

Fully Managed

CPU and Memory Optimized

CPU Optimized virtual machines are with dedicated hyper-threads from best-in-class CPUs for intensive application, and Memory Optimized servers to deliver fast performance for workloads that process large data sets in memory.

Managed Dedicated Operations

In Cloud Computing era people often underestimate the power of dedicated hosting due to other cheap options, but we know the importance of enterprise-grade dedicated hardware that ensures true isolation and control over your resources. Our fully managed dedicated servers come with your choice of OS and softwares or with one of the most popular and advanced hosting panel cPanel/WHM. Our lightning-fast network coupled with DDOS protected Gbps connectivity provide low-latency throughput all around the world.

Fully loaded dedicated operations with ultimate features and flexibility

Managed Dedicated cPanel Server

Fully managed dedicated cPanel servers come with the top of the line and advanced hosting panel (cPanel/WHM) to host multiple sites & environments.

Managed Dedicated Linux Server

Fully managed enterprise-grade dedicated hardware that ensures true isolation and control over, come with your choice of software & tools.

HIGHLY OPTIMIZED

If you looking for better application performance, faster response time, better hardware and software support then you are on right place, we developed highly optimized web-engines for you, chose the one you preferred and get all from it.

- [PHP Stack](#)
- [JAVA Stack](#)
- [MEAN Stack](#)

DDEVOPS WEB ENGINES

DDevOps developed stacks for PHP, JAVA and MEAN, they got highly tweaked configurations combined with additional web layer for caching and security. These stacks design to boost up your application performance up to 90% so you could entertain more traffic with better user experience, security layer helps in intrusion detection and prevent unwanted attempts, choose your stack today and evolve from traditional hosting to DDevOps.

[PHP Stack](#) design to deliver optimal performance, faster response and security, secret ingredients combined with Nginx, Varnish, Redis, PHP, OpCache, Apache, MySQL, Memcached along with optimized configurations.

[Java Stack](#) configured for better security, performance and response time, secret ingredients combined with Nginx, Elasticache, Tomcat, MySQL/PostgreSQL, Memcached.

[MEAN STACK](#) special configuration gives the performance that speeds up and secure the application, secret ingredients combined with Nginx, Node, Angular, NPM, MySQL/PostgreSQL or MongoDB, Redis and Memcached.

WHY CHOOSE MANAGED SERVERS?

More than decade of experience in operations and security, having a track record of high performance, and technology-oriented solutions. We, the best choice for your managed cloud hosting.

Fully loaded Web Stacks with dedicated environment & resources.

Better hardware performance with optimized software architecture.

Integrated and fully secured centralized firewall.

Power tweaks for faster processing & better response time.

Boost performance up to 90% with up to 50% cost efficient solution.

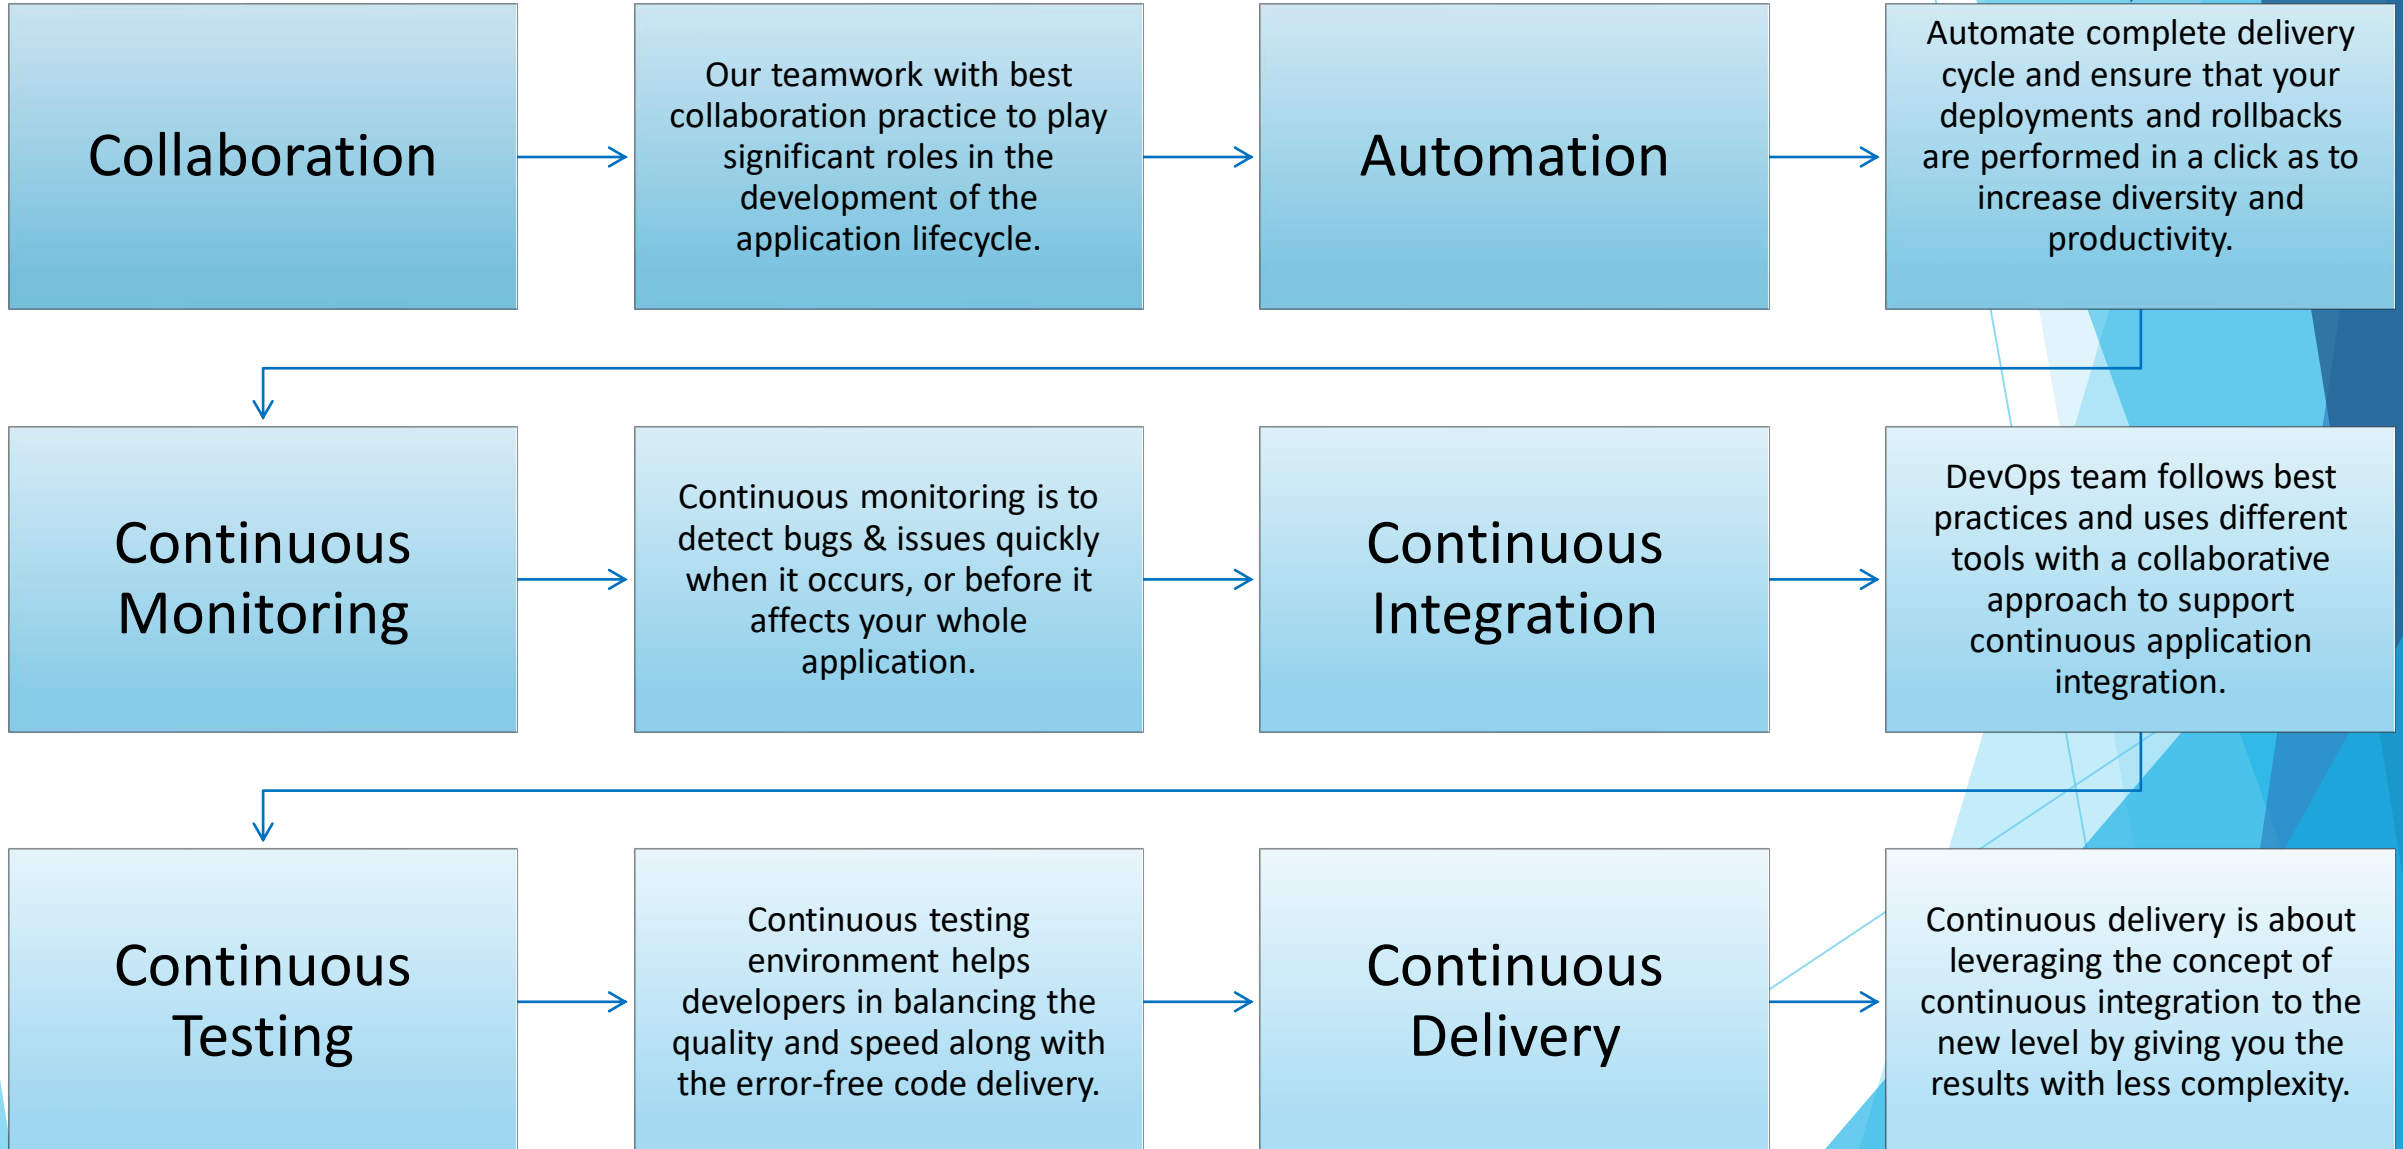

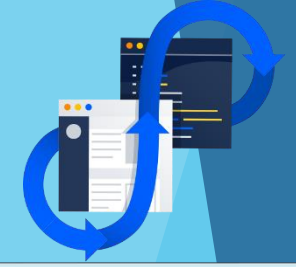

All Managed Server includes...

- Server Administration
- Server & Application Monitoring
- Alerts, Notifications & Statistics
- Auto Healing Service
- Security Updates & Patching
- Configuration Assistance
- Tweak & Optimization
- Backup & Recovery
- Migration Assistance
- Free SSL
- Unlimited Support Tickets
- Round the Clock Emergency Assistance

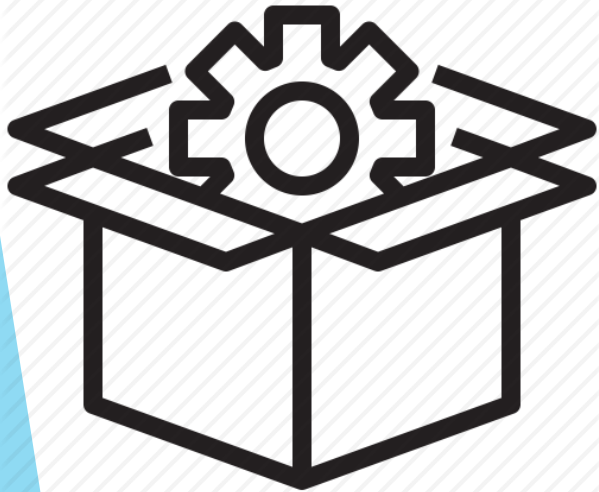

DevOps Services

DDevOps offers wide range of services along with the integration of different tools to keep your application on continuous path of advancement through six major methodology.

Packages & Features

Basic Professional Enterprise

Server and Application Administration
Server & Application Monitoring
Alerts, Notifications & Basic Statistics
Security Updates & Patching
Configuration Assistance
Tweak & Optimization
Backup & Data Recovery
Migration Assistance
Versioning & Git Integrations
Emails & DNS Management
Multiple Environment Support
Multi-tier Steps and Support
Unlimited Support Tickets
Round the Clock Emergency assistance

Notes:

1. Max Two hours daily for DevOps Services for high level tasks, any additional hour(s) will charge accordingly or as per the contract.
2. Starting price covers up to 10 assets that includes Servers, Email and DNS providers, registrar etc. (Any other service(s) or platforms that are used to support your application or infrastructure and you want us to manage).
3. Your Account owner will usually be available during working hours; in case of emergency, he/she will be contacted by the emergency response team.

PROFESSIONAL

Notes:

1. Max Four hours daily for DDevOps Services for high level tasks, any additional hour(s) will charge accordingly or as per the contract.
2. Starting price covers up to 20 assets that includes Servers, Email and DNS providers, registrar etc. (Any other service(s) or platforms that are used to support your application or infrastructure and you want us to manage).
3. Your Account owner will usually be available during working hours; in case of emergency, he/she will be contacted by the emergency response team.

All In Basic DevOps Services

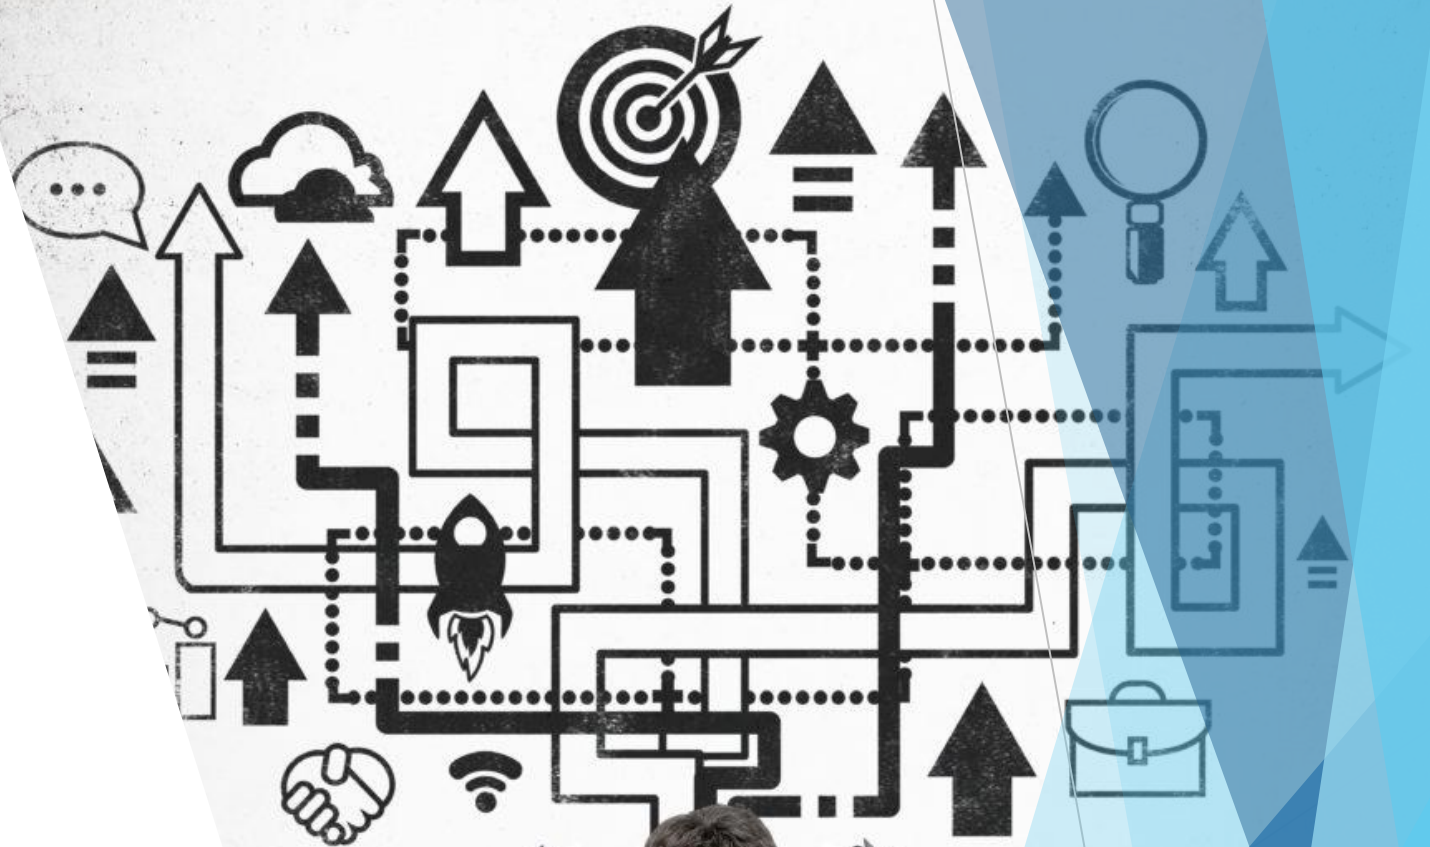

Pro-active Monitoring & Professional Statistics
Premium Web-Stack (PHP, JAVA & MEAN/MERN)
Application & Server Optimization
Security Assistance & Support
Application upgrades & Support
Pro-Active Monitoring & Auto Healing
Server & Application Optimization
Multiple Infrastructure Support (Dedicated, VPS or Cloud)
Migration Assistance & DR Drills
CI/CD Configuration & Support
Dedicated Account Owner
Chat & Email Support or Ticketing System
Round the clock Assistance

ENTERPRISE

All In Basic and Professional DevOps Services

Premium Support & Monitoring
CI/CD Pipeline for Deployment
Automation & Custom Scripting
Custom Configuration & Setups
Advance Security Assistance & Support
High Availability Setup and Support
Third Party Integration and Support
Workshops & Training
Security and System Audit
Staffing Solution and Dedicated Resource
Custom or Dedicated IT Solutions
Phone, Chat & Email Support or Ticketing System
Emergency Contact Number
Round the Clock assistance

Notes:

1. Max six hours daily for DevOps Services for high level tasks, any additional hour(s) will charge accordingly or as per the contract.
2. Starting price covers up to 40 assets that includes Servers, Email and DNS providers, registrar etc. (Any other service(s) or platforms that are used to support your application or infrastructure and you want us to manage).
3. Your Account owner will usually be available during working hours, in case of emergency he/she will be contacted by the emergency response team.

DDEVOPS
Deployment Development Operations

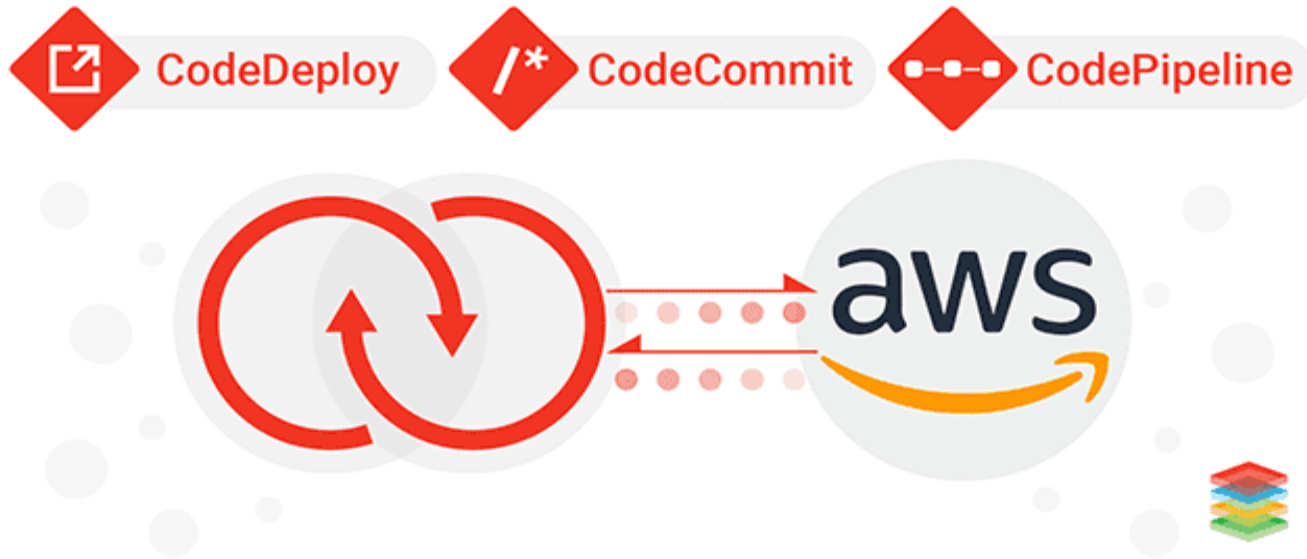

Top Services + Top Infrastructure

DDevOps Experts Partnered with Amazon Web Service

Technological innovation is rapidly changing customer demands. In order to react and respond to changes, speed is vital to a business' ability to attract and retain new customers. Agility is literally defining the competitiveness of a business today. The speed with which we adapt to change depends on the expertise of the team around you. So be sure to trust your business in the hands of experts. Our utilization of automation and our DevOps approach ensures that your computing processes are consistent, reliable, quick and repeatable. Work with a DevOps team that can ensure proper optimization of productivity, enhanced scalability and security alongside cost effectiveness.

DevOps on AWS

What does **DDevOps** Offer on the top of AWS?

- Enhanced security and performance
- Improve deployment efficiency
- CI/CD and Automation
- Continuous monitoring and improvements
- Reduced failures and errors
- High availability for higher ROI
- Fast recovery and disaster management
- Up to 40% cost efficiency

As industry experts, our certified AWS engineers and DevOps professionals proudly offer unmatched infrastructure management services and solutions to anyone looking for cloud solutions from a top infrastructure provider.

SecOps Service

SecOps is the infusion of a security mindset in the execution of secure operations along with agile methods, automation and DevOps practice.

- ❑ Easy and Quick Deployment
- ❑ GEO Location and CDN Support
- ❑ Static and Browser Caching
- ❑ Cost Effective Solutions
- ❑ Ultimate Protection
- ❑ 24/7 Mitigation Support

DDevOps recommend to get yourself protected right from the start with our cost-effective solutions that ensure best security operations, agile security techniques and compiled security platform.

Secure Private Tunnel

Secure Internet Connectivity

Data Encryption

Multiple Devices

No-logs No-Restrictions

Offshore Privacy Protection

Virtual Private Network

Ultra-Fast Connection

Multiple Region

Dedicated IP

1000 Mbps Connection

24/7 Support

Secure your internet connection with top-tier encryption and shield yourself from cyber threats to protect your data online. Securely access apps, websites, business and personal acids, and more.

Secure DNS

Secure and Cost-Effective
Multiple Geolocation Targets
Dynamic DNS
EDNS-client-subnet support
DDoS Protected DNS
100M Queries per month
Web Redirects
Search Engine Friendly
Flexible and Scalable
Statistics and DNS Branding
24/7 Support

Our secure DNS is a world class Infrastructure-as-a-Service (IaaS) solution, allow you to handle up to 100 million queries or legitimate request per month, it has amazing global network along with industry leading DNS expertise and GEO capabilities that help to protect and redirect the traffic to servers, environment & proxies as needed.

Enhanced security with Web Application Firewall (WAF)
Built in DDOS mitigation
Global CDN
Lossless image optimization
Automatic mobile optimization
Cache Analytics
Dedicated SSL
Load Balancing
Rate Limit
Page Rules
24/7Support

Application Firewall

Application Firewall design to filter web server traffic through security set of rules that check incoming requests and block that do not comply or malicious, it catches SQL Injection, Cross Site Scripting(XSS), directory traversal, or other malicious connections related to HTTP/HTTPS protocol. The system also contains basic DDos filters, static caching and CDN capabilities.

Enhanced Security with DDOS Protection

Global CDN

Built-in Web Application Firewall

Image & Mobile Optimization

Cache Analytics

Load Balancing & Dedicated SSL

Rate Limit & Page Rules

99.9% uptime SLA

Easy PCI compliance

SSL certificate Integration

24x7 Email and chat support

DDOS Protection

Our security experts and mitigation engineers are competent to provide the most helpful DDOS mitigation service. Our mitigation network and partners are backed by platforms that have abilities to defeat most difficult & complex attacks.

SECOPS ENTERPRISE SOLUTIONS

Up to 300 Gbps DDOS Protection
10 Million Packet Per Second Protection
UDP, TCP, ICMP, SYN and HTTP Flood Protection
Protection against HTTP/HTTPS, XML RPC, Bandwidth Leeching, Botnet etc.
Application and Infrastructure Security Audit
Built-in Web Application Firewall

DevSecOps is the infusion of a security mindset in the execution of secure operations along with agile methods, automation and DevOps practice.

We put a strong focus on the needs of your IT security to figure out solutions that best fit your demand and recommend to get yourself protected right from the start to build customer trust.

- ▶ Highly Optimized Web Engines combined with Cache Accelerators and Powerful Database Servers
- ▶ Fully Configured, secured independent & Centralize Firewalls
- ▶ Continuous Monitoring, Auto Healing, Power Tweaks & Automations
- ▶ Fully managed web Operation & Technology Assistance for E-commerce
- ▶ Provisioning, Build, Testing, Release and Deploy, complete application lifecycle support
- ▶ Secure Private Tunnel, Web Application Firewall, DDOS Protection, Secure DNS, SecOps and custom security solutions.
- ▶ Round the clock Operational Support and Emergency Assistance by professionals.

INTEGRATED SOLUTIONS

Development Operations is all about IT Solutions, with DDevOps we integrated one window solution for you, either you are an individual, a developer, an agency or a software house, a corporate identity or a large enterprises, we welcome you all. We also help your startups by providing cost effective managed services and take you to be an enterprise by supporting you on the way through Managed IT Operations, DevOps and SecOps Services.

Design & Develop

A PERFECT APPLICATION

We examine deeply, focus more on each pitch to make sure that direction will value our customers in the long-run.

WEB AND APP DEVELOPMENT
PACKED WITH ULTIMATE
FEATURES

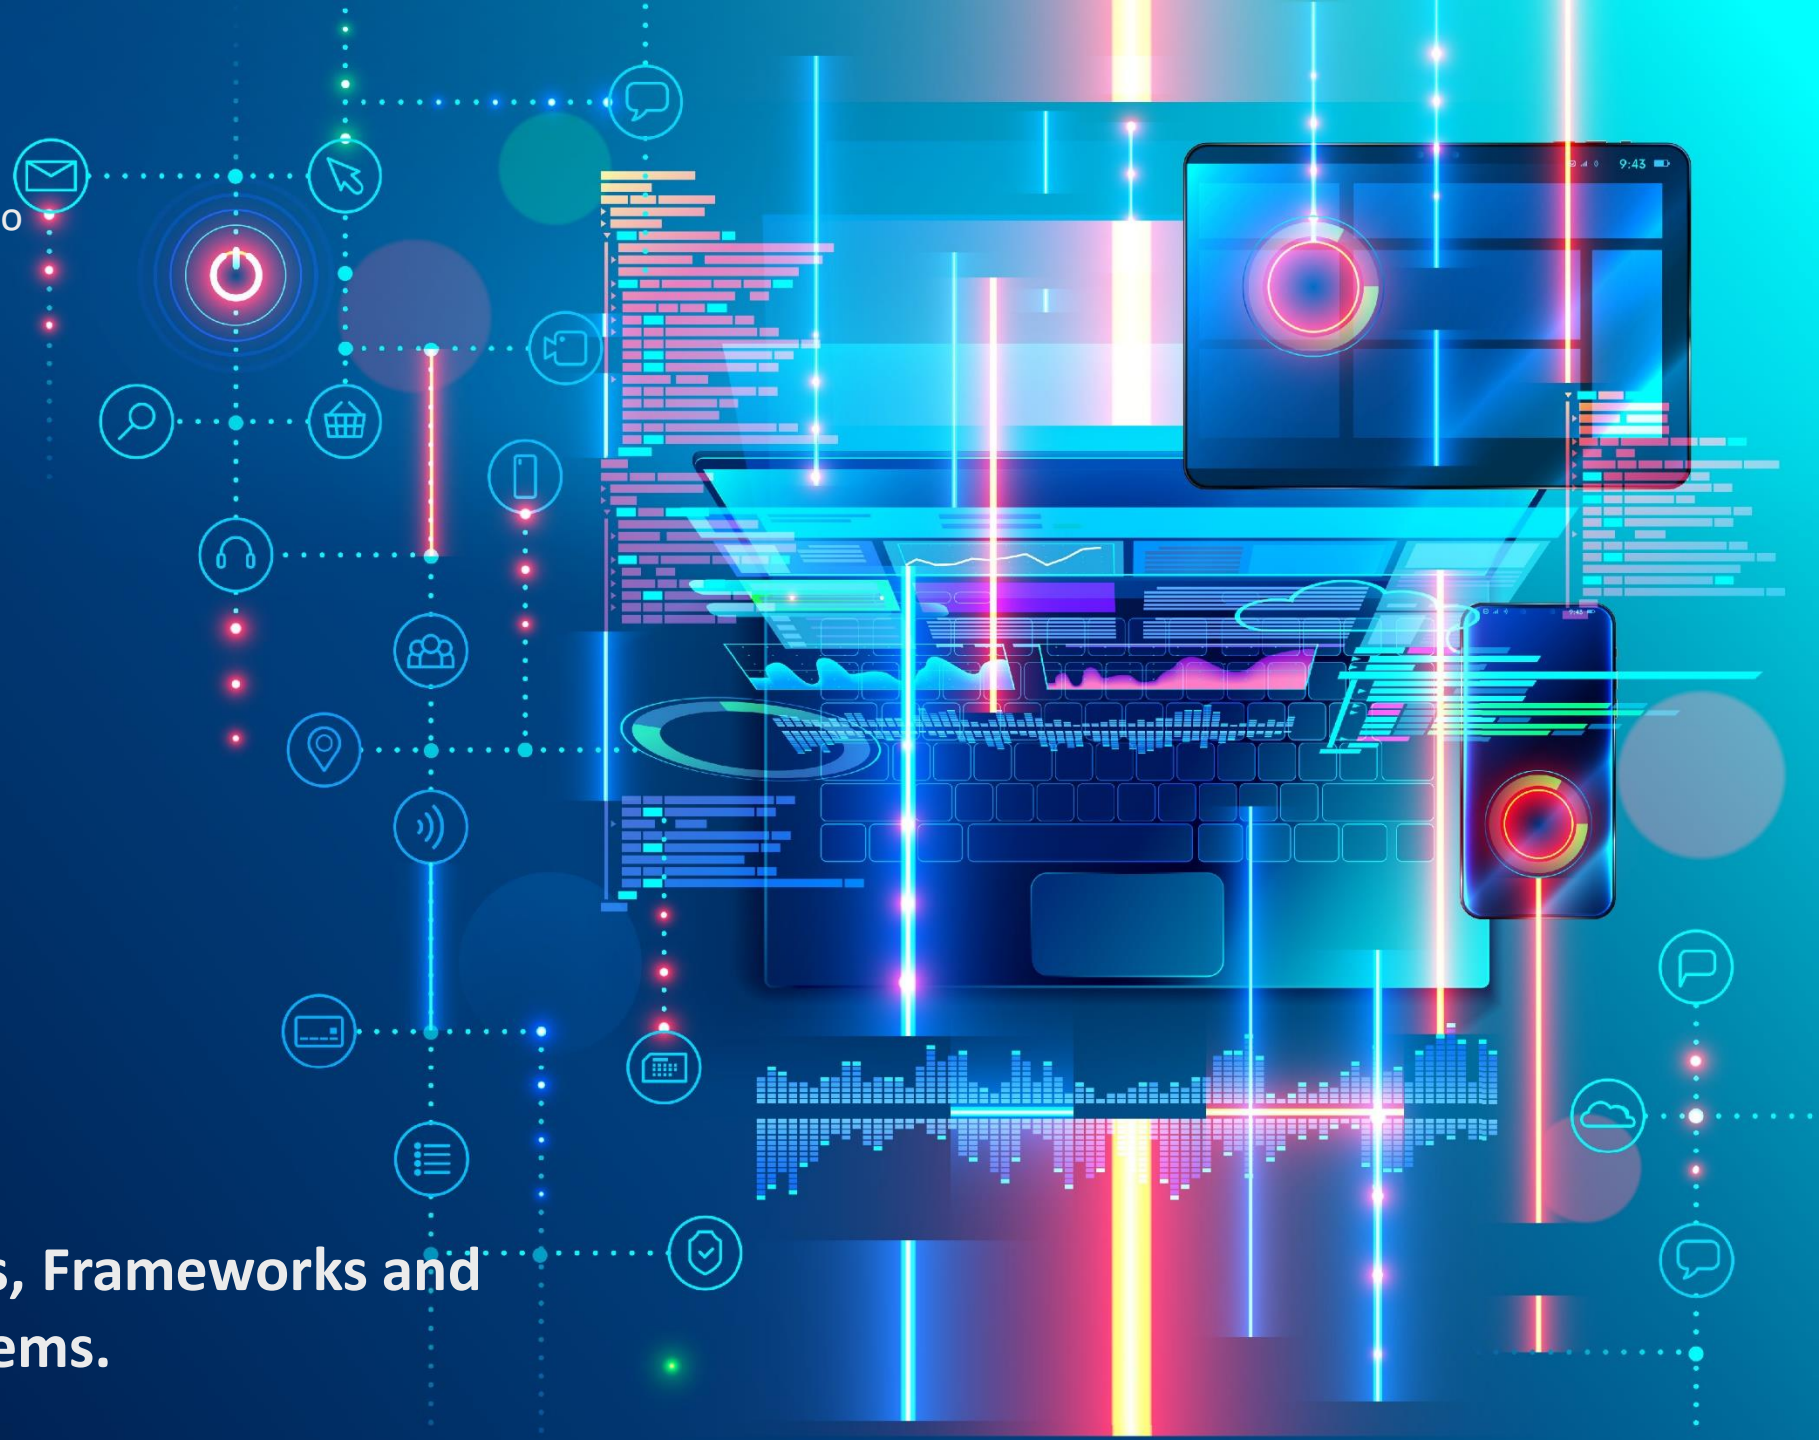

WEB DESING
WEB DEVELOPMENT
MOBILE APP

DDevOps offers Multi-channel digital and technical solutions to your applications. Our technology focus solutions help you to make an impact on world wide web, services include Design, Web and App Development, E-commerce Solutions, Digital Marketing, Strategy Planning, Consulting and Branding.

OUR EXPERTISE

Include Multiple Languages, Frameworks and Content Management Systems.

Wordpress Development

Let's Get Everyone Online

Reliable, Responsive & Progressive Websites For A Year

DDevOps voluntarily provide the most cost-effective service during the COVID pandemic help to get everyone online so they could take technological advantage to get connected with your users/clients all the time, in less than a dollar per day.

Maximize Your Business Relation with Scalable And High-Performing WordPress Development Services!

Along with 1 Year IT Operation!!

E C O M M E R C E

DDevOps e-commerce solution helps startups to grow faster and growing brands to grow even faster, nearly up to twice as fast as the industry standard. We help businesses moving online, empowered startups with DevOps methodologies like CI/CD that aid in the longer run, and growing brands with technology-focused solutions for continuous deployment, development, and operations for continuous advancement so choose us for our market-leading tools, enterprise-grade hosting and uptime, and stunning support.

SOLUTION

01. BRAINSTORMING

First approach would be to sit down and get to know you and vision behind your application. DDevOps will discuss goals, objectives and any other important information that require to build your application.

02. PLANING

With the information collected from our first session, initial design, wireframes would be developed as discussed in brainstorming, defining layout, connections and content arrangement and time frame will be in placed.

03. DESIGN

After the initial design and frames finalized, your unique frontend will be designed to show the look and feel of your website along with initial code that require to support processing of your application design.

04. Deploy

Frontend design will continue rolling unless the final artistic concepts are approved and finalized, the designs are then coded with all the backend requirement to transformed into a fully functional website to deploy on world wide web.

DDevOps 04-Steps Implementation

DEVELOPMENT PLANS

We mainly offer three different type of development plans along with some flexibility to suits everyone's need.

BUILD AND DEPLOY

Suitable for small applications
